PRACTICE MANAGEMENT NEWS

Dallas Supergroup Launched

Podiatric Medical Partners of Texas (PMPT) - **Jay Lifshen**, President has partnered with Integrated Physician Systems (IPS) - Jeff Walker, CEO, to facilitate the merger of 15 practices with 24 physicians in the greater Dallas area. This model allows the doctors to receive the rewards of being a large group while keeping their individual autonomy and control. IPS is providing all merger integration, process re-engineering, revenue cycle management (billing services), CCHIT 2011 certified software (fully integrated PM & EMR software), employee management oversight, credentialing, managed care negotiations, human resources, financial management services, company benefits, and all other back office operational support services.

Jon Hultman, DPM, MBA, Chairman of the IPS Board has stressed the need for supergroups for more than a decade. "IPS was the ideal partner to assist us in becoming a supergroup and managing the PMPT infrastructure," said Lifshen.
